Projects

knowledgEase · [github](#) · [live](#)

Single-page question app inspired by Quora in Backbone, jQuery, and Rails.

- ❑ Integrates typeahead.js, jqCloud, and paper-collapse with custom CSS.
- ❑ Uses custom ActiveRecord queries to create a news feed.
- ❑ Implements notifications on various resources the user subscribes to.
- ❑ Custom AJAX requests to DRY up Backbone code, by not creating models for join tables.

sudoku-on-rails · [github](#) · [live](#)

A rails/backbone app that solves sudoku problems.

- ❑ Implemented in TDD-style with RSpec.
- ❑ Uses backtracking algorithm with pruning to optimize solving algorithm.

bejeweled · [github](#) · [live](#)

A classic game rebuilt for the browser in jQuery

- ❑ Leverages CSS transitions to allow blocks to move simultaneously.

Skills

Ruby, Ruby on Rails, JavaScript, jQuery, Backbone.js, SQL, git, HTML, CSS, SPSS, ArcGIS, Python(learning)
